April 3, 2014 , Moscow - Troitsk

Dear Colleagues,

Beside political interference which affect on the science development in Russia I hope we will keep our cooperation in polar science. Still large part of Arctic is under our control and we are realized of polar science importance. The Sabetta magnetic observatory on Yamal peninsula will begun operation at 2014, and few other points under consideration. Beside magnetic field we plan to install other geophysical instruments as infraseismic, gravity, ionospheric etc.

Now we come over obstacles and POLAR-2014 conference ready to go.

The dates of conference – April 14-16, 2014. Most of participants will arrive in Salekhard at April 13, 2014. The departure date is April 17, 2014. The total number of participants we expect about 60. The foreign scientists are from Ukraine, Hungary, Denmark, USA, Sweden, Taiwan. Also we wait participants via Internet communications. The formal announcement is here <http://interyamal.ru/en/event/720>. The preliminary information displayed on WDC in Moscow here <http://www.wdcb.ru/polar/conference.ru.html>.

So those of you who can not come we invite you to watch the conference via Internet on the site www.polar2014.yanao.ru and present a papers via Skype.

For that we propose the next process. Please sent your presentation on address of LOC in Salekhard (edro17@rambler.ru) with the size about 10 Mb and reserve copy on my address (zait007@rambler.ru). In the beginning of next week we will sent the exact time of presentations.

Preliminary schedule for the first virtual session will be at April 15, 2014, Tuesday at 15:00 -19:00 local time (10:00 – 14:00 UT) and second session will be at April 16, 2014, Tuesday at 13:00 -14:00 local time (08:00 – 09:00 UT). Also important open discussion about the usage of geomagnetic variations and its practical applications will take place at April 16 in 15:00 -19:00 local time (10:00 – 14:00 UT).

In next few days a complete program on English will be circulated.

I will be very pleased to get your reply,

Cordially,

Dr. A. Zaitsev

On behalf of Program Committee
